Leadership Education System for Constructive Change at Strategic Inflection Points and ShortSearch 14 Layers AI Framework Human Evolutions & Devolutions

@ShortSearch Based on ShortSearch 14 Layers AI Evolutions, 360 Degree Leadership Education System and Devolutions diagram model we believe that the major obstacle in achieving Human Rights, Women Rights, Race Equality, Gender Equality, and Animal Rights is the culture and lifestyle of the human beings for the past several millennia, in other words the selfish and self-centered Human culture that is considering owner of Mother Earth, all her species and natural resources. The Human Rights, Women Rights, Women Rights, Gender Equality and Animal Rights Evolutions becomes reality after major cultural changes by simply shifting our paradigm from Human Centric to the Mother Earth Rights Culture at 4th , 5th , and 6th Layers of 7 layers Model. Or in the simplified term when we are transitioning from Selfish Human Interest First to Mother Earth Rights First. If Humanity wants to survive in next 100 years, we are hoping great majority of 7.8 billion people transition to Constructive Human Layer 4 Evolution and beyond by age 30 which is Respecting for Human Rights, Women Rights, Gender Equality, All Species Rights, Empathy with ROI and Positive Impact [10 to the Power 4] Actions result

@ShortSearch believe that the major obstacle in achieving big goal of Stop Ecocide and Protect Earth is the culture and lifestyle of the human beings for the past several millennia, the culture of Human Centric, our solution is a fundamental cultural changes by simply shifting our paradigm from Human Centric to Mother Earth Centric Culture. In the simplified term is transitioning from Selfish Human First to Mother Earth First because human cannot survive if we continue in past 100 years of destructive #Ecocide path.

The uniqueness of our solution is advocating Women Decentralized Leadership from top to bottom and bottom up and by advocating and practicing Mother Earth Centric solutions. We are also promoting Ecosystems Closed Loop Model with Zero Waste versus the current Open-Loop Model with massive amount of Waste & Ecosystems Destruction.

Nearly 1 In 3 Women Experience Violence And @ShortSearch Solution to Failed Leadership

Unfortunately, according to the UN's Population Fund, 1 in 3 women have experienced physical or sexualized violence in their lifetime in the world. Even though FGM internationally recognized as a human rights violation. Based on UN globally, it is estimated that some 200 million girls and women alive today have undergone some form of FGM. These Human Rights, Women Rights, hungry children, climate change, inequalities and other problems that were not solved in past 75 years and these are just tip of iceberg...

Our Conclusion: UN and almost all governments failed to protect women and children ... At new site <https://shortsearch.org/> We support next generation of ethical women leadership in next 10 years to replace current failed leadership by election ... Our solution is based on cultural, lifestyle, paradigm shift from a human-centric destructive greedy centralized leadership without good results to an Earth-centric ecosystem ethical woman decentralized leadership ...

violence prevention the evidence

School initiatives are well placed to prevent violence against women.

School-based programmes can address gender norms and attitudes before they become deeply ingrained in children and youth. Such initiatives address gender norms, dating violence and sexual abuse among teenagers and young adults. Positive results have been reported for the Safe Dates programme in the United States of America and the Youth Relationship Project in Canada.

Media interventions can alter gender norms and promote women's rights.

Public awareness campaigns and other interventions delivered via television, radio, newspapers and other mass media can be effective for altering attitudes towards gender norms. The most successful are those that seek to understand their target audience and engage with its members to develop content. We do not yet know, however, whether they actually reduce violence.
